

# SignMeUp Scanner Test

**Expected Result:** When scanned successfully, you should see "Scanner test code scanned successfully" message in green

## Testing Instructions

- Open SignMeUp on your phone and go to the scanner page in the admin area.
- Use this to verify your device can scan SignMeUp QR codes.
- If scanning works, you'll see "Scanner test code scanned successfully".

## Troubleshooting Tips

- Ensure good lighting - avoid shadows on the QR code
- Hold device 10-20cm away from the code
- Try different angles if initial scan fails
- Clean your camera lens if the image appears blurry
- Tap the scanner to refocus if needed
